UK Work Permit Visa from India - Tier 2 General Visa

The UK Tier-2 (Skilled Worker) visa offers professionals a chance to work and settle in the UK for up to five years, with salaries averaging £35,000–£45,000. It targets high-demand fields like IT, finance, healthcare, and engineering. Key IT skills in demand include programming (Java, Python, C++), DevOps, AI/ML, cloud computing, cybersecurity, and CRM. Major job hubs include London, Manchester, Birmingham, and Edinburgh. The visa requires a job offer with a salary of at least £25,600. With strong career prospects and a streamlined migration route, the UK remains a top destination for skilled professionals seeking global opportunities.

The UK Skilled Worker Visa allows skilled professionals to work in the UK for up to 5 years. Applicants must score at least 70 points, which are based on having a job offer, an appropriate salary, English language proficiency, and maintenance funds. The visa is available for various professionals, including those on the shortage occupation list, intra-company transfers, ministers of religion, and sportspersons.

Applicants must provide documentation, including a valid Certificate of Sponsorship, salary details, passport, proof of English skills, and police clearance. The visa processing time is typically three weeks, with a maximum stay of 5 years, extendable based on job contract length. Skilled Worker dependents (spouse, partner, and children under 18) can also apply for a dependent visa. They must show financial means to support their stay.

The application process can be done simultaneously or later, and successful applicants can work, study, and remain in the UK as long as the primary visa holder stays. However, dependents cannot access public funds, work as doctors, dentists, or sports instructors. To qualify, applicants need a Certificate of Sponsorship from a UK employer, which can be found in the Register of Sponsors.
